## ADDRESS OF THE HEAD OF THE ALTAI REPUBLIC

Oleg Leonidovich Khorokhordin

*The Altai Republic is a truly distinct region in every sense. Situated at a crossroads of borders, it boasts an abundant cultural and historic heritage, ecologically sound natural resources, and most notably, benevolent and hardworking people committed to making Altai strong.*

*Hospitality, untouched and beautiful nature have made the Altai Mountains a "tourist Mecca" of Siberia and the whole of Russia, the flow of guests from abroad is also stable growing. At the peak of the tourist season, there are 10 tourists per 1 inhabitant of the republic. Many people already know and love our environmentally friendly agricultural and health products. Our task is to realize effectively the competitive advantages of the Republic, to unlock the existing potential while supporting the course for further development in line with innovation and the "green economy".*

*We all see the drastic changes that are taking place in the field of improving the investment climate. The Federal Center on behalf of the President, within the framework of national projects and programs, directs significant funds to the regions to support business, to create infrastructure. The legislation is being reformed in order to protect the interests of investors, and the openness of the authorities is increasing. The Altai Republic supports and develops this ideology.*

*Significant work has been done to improve the transport accessibility of the region: we have established air links with Moscow, St. Petersburg, Kazan, Yekaterinburg, Novosibirsk and Krasnoyarsk and other cities. The capacity of our main highway, The Chuyskiy tract, has been expanded. The stability of energy supply and communications is increasing, the coverage of gasification is expanding.*

*For a number of years, our region has been demonstrating positive dynamics of investments in fixed assets, and this is one of the main indicators of assessing working conditions on the part of businesses.*

*Today, the largest Russian companies invest in the republic. For example, Sberbank, Gazprom, AFK Sistema, Russian Railways are implementing projects in the field of health care and tourism. The Hevel Company has implemented a large-scale solar power generation project. Large companies bring advanced technologies with them, create high-performance jobs, open up new markets and niches for the development of small and medium-sized businesses.*

*Today we are ready to offer investors a number of major projects in the field of tourism, recreation and entertainment, logistics and processing of agricultural products, biopharmaceuticals, airport infrastructure, development of territories. There are interesting proposals for smaller-scale projects.*

*The Regional Institute for Investment Activity Support provides investors with the possibility of obtaining tax benefits, the right to conclude lease agreements for a land plot without bidding, project support on the principle of "one window" and other preferences.*

*Head of the Altai Republic  
O.L. Khorokhordin*

# ALTAI REPUBLIC TODAY
